

THINKING TRAPS

Dot Voting

INSTRUCTIONS

This is a group exercise called “dot voting.” Dot voting is a collaborative, efficient, and engaging method for visualizing a group’s collective instincts and inclinations. It’s also a great way to spark discussion. This exercise is best done after reviewing the [Thinking Traps Glossary](#).

Step 1 Print out each thinking trap on a single sheet of paper and tape it to the wall.

Step 2 Give each student five stickers. They will vote by placing stickers on the posters. They can place one sticker on five different traps or all five stickers on one trap, or some other distribution. They do not need to use all their stickers.

Ask them to vote on which traps they think are most important for younger teens to learn about before they get their first phones or start using social media.

Step 3 After voting, stand back and discuss what their votes say about how tech impacts our thinking.
